Step one

Locating and screwing the trap in the tunnel:

- | Use size 6 x 25mm rust proof screws
- | Traps should be fixed with the treadle 5mm (approximately) from the side of the box and the baffle.

Step two

Setting the trap:

- | Pull carefully on the wire setting loop with your hand. Continue past the top of the trigger arm, allowing the trigger arm to drop onto the treadle.
- | SLOWLY release pressure, allowing the bottom of the trigger arm to gently ride up treadle and catch on the sear.
